

Video Script:

EVERYTHING YOU WERE NEVER TOLD ABOUT THE GLOBAL DISEASE CRIME SYNDICATE: BEYOND THE COVID COVER-UP.

What if everything you know about COVID-19 and the international response to it was a deadly lie? What if you learned that everything the media told you about COVID, even Dr. Fauci's involvement in the lab virus Cover-up was a lie. full of omissions, misrepresentations, diversions, and fraud. And what might our lives be like if we were honestly informed about the causes and cures for COVID, and virtually all diseases. What might our world be like?

I'm Dr. Leonard Horowitz, I've been a successful investigative journalist and emerging diseases expert for more than three decades. All these years I have been tracking and reporting on lab viruses, their outbreaks, and the crisis capitalism that surrounds them. My works have been heavily censored. I've studied the drug and vaccine industry, influential lobbyists in Congress, the Department of Defense, and Department of Justice and their actions in multiple cover-ups, and here the COVID injustices and unjust enrichment of those who profited off of COVID's creation and dissemination. Now, millions of us, We The People, have died and people worldwide want answers to COVID questions, many of which I answer in this video. I believe the intelligence I provide here will help you, investigators and prosecutors, answer many unanswered questions about the pandemic's origin, and hopefully bring many COVID criminals to justice. This documentary is provided in support of this mission in collaboration with Medical Veritas International, Inc., a 501c(3) non-profit.

I. EXECUTIVE SUMMARY

There are three main cover-ups in the COVID mass murder case. They include first the source of the virus in HIV/AIDS research and patented developments. Second, the exact federal programs, agents, agencies, and parties, including Hunter Biden, one of his companies called Metabiota, and Fauci's cohorts, including those in China and England responsible for the virus's production, circulation, and alleged deployment; and third, Chinese involvement and foreknowledge of the release and anticipated pandemic. Summarily, the intelligence and evidence provided here urgently demands a moratorium on the genetic engineering of microbes that are being mass produced for allegedly public health, disease prevention, and cancer control.

A. The Biden 2014 Pardons

As is widely known, before leaving office, President Joe Biden issued a series of preemptive pardons that have presumably blocked federal prosecutions of Dr. Anthony Fauci, Hunter Biden, other Biden Family Members, and Army General Mark Milley. These pardons direct attention to the common date of 2014. Why 2014? This film details the common financial activities these suspects engaged in regarding the COVID virus's development, outbreak, even alleged deployment. I address not simply a "lab leak" or accidental outbreak, but additional evidence of intentional release—a bioweapon deployment for globalization and profitable depopulation. This generally neglected and unconscionable "conspiracy theory" must be considered in light of the new evidence being revealed from Fauci's e-mails, Diary, and phone records. In fact, from this new evidence, the pardons themselves evidence criminal activity ongoing before 2014. These extend beyond Dr. Fauci to Jeremy "James" Farrar of the Welcome Trust and World Health Organization, the Bidens investment in Metabiota predating 2014, and most importantly to Bill Gates and his Foundation. All of this pre-2014 activity is subject to state and federal investigations and prosecutions. In this context, one important common denominator, not to be overlooked or simply dismissed is the suspects' disdain for Donald Trump and the Christian right. This is made nauseatingly clear in Fauci's Diary. Fueling conspiracy theories, much like the opposition that President Trump experienced during RussiaGate, key suspects in the Democratic Party and Deep State including Bill Gates and George Soros, viewed the "China-virus" outbreak as financially beneficial, and socio-politically and economically expedient for destroying America's sovereignty and advancing globalization. This was made abundantly clear by Klaus Schwab of the World Economic Forum, who tied the pandemic and advancing AI to the Fourth Industrial Revolution. The World Economic Forum is currently directed by Larry Fink of Blackrock, who similarly despised Trump and opposed his presidency. Bioterrorism and disease induction drives geopolitical and financial agendas of the rich and infamous. Therefore, intentional release cannot be dismissed as a nonsensical "conspiracy theory." It must be investigated. Industrial espionage and sabotage happens in the real world, and in this case, in retaliation against the anti-Big Pharma and anti-globalist policies of Presidents Trump and Xi Jinping. Bioterrorism is ongoing and well evidenced, such as with Fauci's 2017 lecture at George Washington University, predicting the Trump 45 Administration would be faced with a horrible new plague. Add to this evidence the Event 201 pandemic preparedness conference sponsored two weeks before the first COVID-19 cases were reported. Event 201 was sponsored by Bill Gates, the World Economic Forum, and Johns Hopkins that fed the media and our brains all the gloom and doom propaganda needed to frighten us into submission, enabling what amounted to pandemic fascism. That was "Mind Control" at its best, the abuse of behavioral science and mass media

programming about COVID to frighten civilization into pharmaceutical submission. They fed us frightening morbidity and mortality statistics so that we would get vaccinated, drugged, masked, distanced, persecuted and prosecuted if we resisted. All profiting Big Pharm and World Economic Forum insiders. And then, completely censored, absent from political and media attention, was the new “Chinese Vaccine Law,” Passed on August 27, 2019, just before the outbreak. It answered the question raised by China’s CDC Director and Event 201 delegate, George Gau, who asked, pointing to the private sector industrialists profiting from plagues, “Where is the money? Give us the money!” This too strongly evidences China’s and the West’s foreknowledge of what was about to unfold globally with COVID-19, financially and otherwise.

B. HIV/AIDS Genes in SARS-CoV2

Rand Paul and all members of Congress concealed the HIV/AIDS genetic engineering of the primary “gain-of-function” Spike protein antigen causing much, if not all, of the deaths and diseases associated with COVID-19. That fact is found the infamous January 31 thus February 2 panic in Fauci’s ‘inner circle.’ They met for damage control to conceal: a) the HIV/AIDS vaccine research and developments spawning the COVID-19 spike protein development; b) the threat of airborne AIDS being spread and the public panic that would result from this news and exposure. The vaccine industry would be blamed and liable for its failure to prevent deaths and diseases originating in bioengineering, genetically mutating viruses; c) the risks in developing mRNA vaccines featuring that Spike protein bioweapon linked to early HIV/AIDS research and developments, including the AIDS virus itself; d) avert condemnation of the vaccine industry, the public and private—government and corporate collaborators; e) an enterprise commercializing diseases and deaths; f) concealing the overriding depopulation and disease control policies advanced by the Deep State globalists and oligarchs active in the World Economic Forum, especially the Bill Gates and Jeremy Farrar of England’s Wellcome Trust, who is the science director for the World Health Organization at the time of this filming, directing Fauci and his cohorts in alleged organized crimes while directing the COVID-19 lab virus cover-up.

C. The PREEMPT & DEFUSE PROGRAMS

The COVID Cover-up extends to the Defense Department’s PREEMPT and DEFUSE programs co-funded by Fauci’s entities, the NIH and NIAID. This knowledge is based on the testimony of whistleblower Lt. Col. (then Maj.) Joseph Murphy, of the U.S. Marine Corps. He was Commandant of the Marine Corps’ Fellows at DARPA, the Defense Advanced Research Programs Agency. His memorandum to the Department of

Defense Inspector General was titled “SARS-CoV-2 Origins Investigation with US Government Program Undisclosed Document Analysis.” Did you get that “UNDISCLOSED DOCUMENT ANALYSIS.” Murphy’s was a scholarly factual analysis of the generally secreted DEFUSE program. **DEFUSE** stands for **Defusing the Threat of Bat-borne Coronaviruses**. That was the title of the (supposedly unfunded) 2018 proposal submitted by EcoHealth Alliance (Peter Daszak as PI) and collaborators to DARPA’s PREEMPT program. **PREEMPT is an acronym that** stands for **PREventing EMerging Pathogenic Threats**. This is the official name of the DARPA program (solicitation HR001118S0017, Biological Technologies Office, announced January 2018; that is one year after Donald Trump assumed the presidency). The program’s goal was to develop approaches to stop viral pathogens in animal reservoirs or insect vectors before they spill over into humans, rather than treating people after infection. Lt. Col. Murphy is a whistleblower who remains generally neglected, although Rand Paul posted his disclosures. Murphy’s censorship and disparagement caused untold deaths and damage to public health and national security. His opponents contest the fact that humanity urgently needs a MORATORIUM ON ALL OF VACCINOLOGY, pending ethical and criminal reviews, and regulatory actions, in the aftermath of the DEFUSE Program that sourced what most people wrongly believe was simply a virus. COVID-19 was not simply a virus. It was and is a BAT VACCINE! COVID-19 is not only erroneously considered a SARS CoV2 recombinant, but it is actually an experimental bat vaccine that was manufactured at the Wuhan Lab to be sprayed on bats, not humans, in the alleged hope it would reduce the risk of humans getting sick from bats. In other words, what leaked from the Wuhan lab, was a vaccine experiment gone wild.

D. China’s Timely New Vaccine Law

The third leg of the COVID Cover-up conceals China’s substantial investment in mRNA vaccinology and MODERNA specifically, only to defect from the Western vaccine industry just before the pandemic. This news was generally ignored. China passed a new vaccine law on August 27, 2019, two months before we heard anything about COVID-19. China’s new law took effect on December 1, 2019. That is synchronous with the time the outbreak. The COVID-19 “virus/vaccine” that is, the 2019 SARS, CoV-2/HIV-1 spliced recombinant bioweaponized vaccine for bats—first resulted in the 7-person cluster of cases one month later at the Wuhan market. People in government, the media, and Big Pharma’s corporate sector, didn’t want the truth about the lab origin to come out since it was tied to the DEFUSE project and mRNA vaccine developments at Harvard, MIT, Moderna, Pfizer and Wuhan. This heralded “emergency” benefitted industry investors, including Chinese companies and officials. The original U.S. Government Record exposing this was concealed briefly on February 8, 2020. I [recovered it from Wayback.org](#) as shown here. This briefly censored record

was re-published on-or-about February 9, 2020 following my efforts to locate the missing record.

This legal record makes known that the Chinese government suddenly and adamantly opposed the commercial interests of Big Pharma. China no longer trusted what was happening within Anthony Fauci's inner circle. Their withhold of information compounds suspicions; and burdened American officials who the Chinese knew were complicit in the outbreak. China went into direct competition with Western vaccine makers at that time. China's new law: (1) criminalized vaccine manufacturing and distribution misbehaviors; (2) monopolized the manufacture and distribution of vaccines in China in favor of the government; (3) pledged free vaccines were to be exclusively administered to citizens; (4) mandated vaccinations for all Chinese citizens; and (5) created a compensation program for vaccine injuries. (Compensation, presumably, would be minimized by the government taking over vaccine manufacturing, distribution, testing and certification processes, thereby assuring quality, efficacy and safety of vaccines—actions Big Pharma opposes, with support from American lawmakers complicit in the global genocide by willful blindness.

II. THE GLOBAL BIOCRIMES SYNDICATE

Rand Paul has been the 'face' of Fauci prosecution in Congress, while all of Congress, the media, and scientific community, conceals the HIV/AIDS genetic engineering of the primary "gain-of-function" Spike protein antigen causing many, if not most, of the deaths and diseases associated with COVID-19.

House Judiciary Committee chairman, Jim Jordan, to no avail, heralded the infamous January 31 thus February 3 panic attack that Fauci and his 'inner circle' suffered that weekend in early 2020. Our lead suspects teleconferenced and e-mailed frantically throughout the weekend, all night long, into the wee morning hours, for damage control. What did they need to hide, discredit, and. neutralize? A scientific publication they called "the Indian Paper" while concealing the honorable and scholarly authors, nine of them, led by Prashant Pradhan from the Indian Institute of Technology, New Deli. Here is an image of that publication that arrived in my e-mail box on Friday night, January 31, 2020.

The Indian paper detailed, "4 unique inserts" in the 2019-nCoV [spike protein antigen, the now known "gain of function" bioweapon], all of which have identity / similarity to amino acid residues in key structural proteins of HIV-1, [the human AIDS virus] unlikely to be fortuitous in nature." Meaning the inserts had been sourced from early HIV/AIDS work financed and concealed by the same federal funding agencies that

created COVID-19, Fauci's organization, largely the NIH and NIAID enterprise. Then the tell tale amino acid sequences were spliced into the gene sequences of the virus's immune cell attachment apparatus. This was the "gain-of-function" enabling the man-made pathogen to attach to human cells and do its dirty work, corrupting human DNA function, cellular immunity, and causing deadly side effects.

Detailing further, the cover-up was conducted to conceal:

a) the COVID bat vaccine integration of HIV/AIDS genes in the Spike Protein antigen. This parallels Fauci's NIAID grant to Fauci's close colleague, Dr. Robert Gallo, in 2016 to develop an AIDS vaccine. Gallo's team was awarded \$14.4 million to do precisely what Peter Daszig's group at Ecohealth Alliance in Wuhan aimed to do in bats—to overcome a major challenge in HIV and coronavirus vaccine development to produce long-lasting (durable) antibodies that could protect against infections. This built on the group's Full-Length Single Chain HIV vaccine candidate, which had entered Phase 1 clinical trials in late 2015. NIAID (directed by Fauci) was the funding agency. Gallo publicly noted NIAID and other supporters (including the Bill & Melinda Gates Foundation) were critical partners in the work. And it was this work that modeled the development of the Pfizer and Moderna mRNA vaccines that used the same immunogen insertion strategy to defeat the COVID-19 infections.

b) The cover-up also effectively prevented public panic over the spread of AIDS-like diseases by negligence. For decades thousands of scientists had been pleading for a moratorium on such gain-of-function research and developments. Early opponents included Dr. Joshua Lederberg, who later in life joined Fauci's ilk, encouraging genetically mutated viruses in hopes of developing effective vaccines to cure cancers.

c) The cover-up averted condemnation of the entire biotechnology industry that was burgeoning, especially through the integration of AI and biomedical data mining systems. Revelations jeopardized the multi-trillion-dollar biodefense industry, and especially the CIA's renewed Project Stargate. A stoppage would financially devastate the public/private—government and corporate—disease enterprise that neglects deaths or considers them acceptable collateral damage. This part of the cover-up employed the strategy of censorship, defaming and discrediting whistleblowers as "conspiracy theorists." Fauci references this activity in his Diary—smearing those who challenged the industry's investments, that now include nano-neuro biotechnologies using graphene to fuel the brain-cloud connection and biomedical data mining.

d) And most disturbing, beyond comprehension for most people who are trusting and naive, the cover-up concealed the overriding depopulation and disease control policies

advanced by the Deep State globalists and oligarchs active in the World Economic Forum. These suspects include the Bill Gates & Melinda Gates Foundation, the World Bank financed World Health Organization, and Jeremy Farrar of the England's old money, Oxford University and the Wellcome Trust. As Bill Gates lectured during a Ted Conference presentation, vaccines could be relied upon to reduce 15% of the world's population. This unconscionable concept is justified environmentally to reduce the carbon burden. Gates defends it claiming incongruously that vaccinated women birthed less children because vaccines produce healthier children, so the women don't need to produce as many.

In the aftermath of all this COVID cover-up, Farrar was rewarded with the position of science director for the World Health Organization. It was Farrar who directed Fauci and his cohorts in alleged organized crimes, including Christian Andersen and Metabiota's Robert Garry (among the chief co-authors of the *Nature New Medicine* fake science report dismissing the lab virus origin theory, and directing the entire COVID-19 lab virus cover-up that Fauci denied for years.

Here, from Fauci's Friday night e-mail to John Mascola, that started that weekend's turmoil and cover-up for damage control in response to the "Indian Paper," you see John Mascola's identification of the HIV/AIDS virus glycoprotein 120 and gp41, referred to as a "furin cleavage site" that the Indian Paper identified as the laboratory gain-of-function gene splice that didn't happen by nature. This is smoking gun evidence that COVID was man-made in fact for research and vaccine development.

Mascola is an American physician-scientist, immunologist and infectious disease specialist. He was the director of the Vaccine Research Center, part of the National Institute of Allergy and Infectious Diseases, National Institutes of Health. He also served as a principal advisor to Anthony Fauci, director of NIAID, on vaccines and biomedical research affairs. Here, Mascola is advising Fauci that the Indian Paper concerns are respectable, and that public concerns about a form of aerosolized AIDS spreading from a lab are likewise troubling.

And here, from Fauci's Diary, you can read what he thought the moment he learned about the COVID HIV/AIDS scandal. He wrote:

"When I got back to my office, got call from Jeremy Farrar who sounded very concerned and conferenced me in with Kristian Anderson, an evolutionary biologist from Scripps. They had also been talking with Eddie Holmes, another evolutionary biologist from Sidney Australia. There have been conspiracy theories that the virus was given GOF [gain-of-function] by inserted mutations and deliberately or accidentally

released in Wuhan. One theory was written by Indian investigators that HIV sequences were inserted by a Chinese person in Canada and released in Wuhan. Everyone thinks that is crazy, but the Farrar phone call was different. The people on the phone felt that the mutations around the furine cleavage site of the spike protein could not have occurred naturally since it would require an evolutionary jump that they found nowhere in bat isolates. They bring up the possibility that this could have been deliberately inserted and either accidentally released or deliberately released by a crazy person in the lab, the former being the most likely. Jeremy was calling me for advice. I suggest that we get a larger group of qualified evolutionary biologists/virologists together under the auspices of a convening body and carefully look at this. We agreed to convene by phone the next day. I called Brian Harrison and Garrett Grigsby who arranged for a call with Azar to decide what to do. Azar did not like the idea of WHO as convener because he feels (somewhat unfairly, I believe) that Tedros would immediately tell the Chinese and they would crush the attempt and/or think we are attacking them.”

In other words, not only did the COVID-19 virus not emerge from the wild, not from bats or pangolins, and not by zoonosis in a fish market as Fauci’s team repeatedly falsely defended, but from a lab using early HIV/AIDS virus attachment technology and proteins called “Spike Protein” antigen. They spliced that into the bat SARS Coronavirus mutant, genes from the AIDS virus, initially identified by Fauci’s close colleague and Fauci AIDS vaccine grant recipient, Dr. Robert Gallo.

Here, in fact, you can view the earliest contract to developed AIDS-like and Ebola-like immune system ravaging viruses for germ warfare under the guise of “cancer research.” This is the U.S. Government, National Cancer Institute, NIH Contract number 71-2025 titled “Investigations of Viral Carcinogenesis in Primates.” That means monkeys and humans. And this contract was paired in the same Special Virus Cancer Program record with the Merck vaccine company’s Contract 71-2059 titled “Oncogenic Virus Research and Vaccine Development,” advancing the “Study of Viruses in Human and Animal Neoplasia,” that is, cancer.

So Fauci has been a cover-up artist all these years—a front man for what amounts to a global organized biocrimes syndicate. His diary makes known who he was working with and what he was doing to represent or misrepresent truth, lies, and his complicit agents and agencies concealing in the media what amounts to profitable bioterrorism and global depopulation, or genocide.

What the Indian Paper, and Fauci’ response to it, also reveals is that the precise federal program that applied this HIV/AIDS virus manufacturing biotechnology and vaccine

development intelligence also created the COVID' emergence from the Wuhan lab, as the facts in evidence detail next.

III. METABIOTA and the DEFUSE PROJECT

On March 27, 2018, Federal hero and whistleblower, Lt. Col. Joseph Murphy, of the U.S. Marine Corps, the Commandant of the Marine Corps' Fellows at DARPA, submitted his memorandum titled "SARS-CoV-2 Origins Investigation with US Government Program Undisclosed Document Analysis" to the Department of Defense Inspector General who was Sean William O'Donnell, who also served as Inspector General of the U.S. Environmental Protection Agency. He was previously appointed to be the acting Inspector General of the U.S. Department of Defense in April 2020, resulting in his membership on the Pandemic Response Accountability Committee, which oversees \$2.2 trillion in government spending.

Col Murphy's memo to O'Donnell addressed the 2018 EcoHealth Alliance "Project DEFUSE" proposal that was submitted for funding under DARPA's PREEMPT program with collaborators including the Wuhan Institute of Virology and Ralph Baric of the University of North Carolina. Murphy reported that the unclassified DEFUSE documents—which described the critical bioengineering research and COVID-19s development according to the evidence at hand, involved inserting furin cleavage sites into SARS-like bat coronaviruses in ways closely resembling features of SARS-CoV-2. The EcoHealth proposal had been wrongly placed on a classified network rather than open access in accordance with DARPA's rules. Instead, this intelligence was provided exclusively to the Intelligence Community, raising the spectre of suspicion about who in the CIA, FBI or National Security Agency, actually stood to profit from the project. Suspects include the aforementioned oligarchs. Murphy raised scientific and sociopolitical concerns that this solid evidence was not properly considered in the Office of the Director of National Intelligence's COVID-19 origins assessment released on August 27, 2021. Murphy also alleged related wrongdoing involving U.S. government programs administered by the NIH, NIAID, and EcoHealth.

A. The DEFUSE PROJECT

Project DEFUSE (full title: "Defusing the Threat of Bat-borne Coronaviruses") was a 2018 research grant proposal submitted by EcoHealth Alliance to the U.S. Defense Advanced Research Projects Agency (DARPA) under its PREventing EMerging Pathogenic Threats (PREEMPT) program (solicitation HR001118S0017).

1) The Key Facts in Murphy's submission, dated March 27, 2018, include Principal Investigator Peter Daszak (of EcoHealth Alliance) requested funding of approximately \$14.2 million over 3.5 years to what amounts to the COVID pandemic's lab origin. DARPA reviewed Daszak's (really the Deep State's) DEFUSE program as "selectable." But white hats inside DARPA rejected the full funding, without disclosing how much federal funds were actually granted covertly. Obviously, some money paid for that project from which the bioweapon emerged. According to all news outlets, including AI systems reporting the details, the federal funding was never granted by DARPA. But it was obviously funded by parties yet to be identified, because we suffered the first COVID-19 cases six months later. Reviewers in DARPA raised concerns that this genetic engineering, novel virus, and vaccine trial on bats, humanized mice, and possibly humans, potentially involved gain-of-function dual-use research of concern; it lacked a risk mitigation plan; and insufficiently addressed ethical, legal, and social issues, data usage, and related regulatory compliance.

In other words, despite these warnings and rejections from virologists and bioscientists within DARPA and the military, Daszak advanced the project knowing the risks with funding from undisclosed parties, including presumably or apparently Fauci's cohorts in alleged COVID crimes, including Bill Gates and Hunter Biden who took a major stake in one of the premier intertwined corporate suspects—a company called Metabiota. This fact best explains Joe Biden's pre-emptive pardon of Hunter dating for 2014—the year Metabiota was activated.

2) Key Justifications for Bioweapons R&D

All of this commercial activity was justified and authorized by Fauci's explanation found in his Diary note of August 2, 2001. Here, Fauci details a NIH and National Security Council meeting with key Biological Weapons Convention analysts, including suspects Thomas Monath of the anthrax and smallpox vaccine maker Acambis; George Poste from Harvard and Arizona State University—a key biodefense and national security official; and Joshua Lederberg—the famous American molecular biologist known for his work in microbial genetics, artificial intelligence, and the United States space program. Years earlier, mind you, Lederberg loudly opposed the risks of genetically engineering viruses for gain-of-function vaccinology. Apparently, his opposition waned as explained in Fauci's diary note.

Fauci and his cohorts in alleged fraud and crime met to "review a White Paper that had been put together as an internal (classified and never declassified) document for President Bush five weeks before 9/11. The President had just rejected signing the renewal of the Biological Weapons Convention (BWC) on the basis that it was

unenforceable.” The Bush administration had falsely claimed Saddam Hussein’s regime held biological weapons of mass destruction, including anthrax, and used that bioterroristic threat to justify ordering poorly tested and risky anthrax vaccines for the military. The Acambis company manufactured that vaccine that reportedly caused Gulf War Syndrome in the troops as the injections damaged their immune systems.

In April, 1998, OraVax/Acambis Vice President, Dr. Thomas Monath met with President Clinton, New York’s Emergency Management Director, Jerry Hauer, Rockefeller University president emeritus and American Type Culture Collection (ATCC) curator, Dr. Joshua Lederberg, CIA Director John Deutsch, and government biological weapons expert William C. Patrick, III, to discuss/negotiate the first purchase of millions of dollars of these dangerous anthrax vaccines, plus smallpox and West Nile virus vaccines too. In fact, Jerry Hauer was working under Mayor Rudy Giuliani at the time directing crisis management.

a) Inside Trading on Bioterrorism

Subsequently, repeating the Deep State’s pattern and practice of inside trading and profiting from outbreaks, media promulgated terrorism, and bioterrorism, Past FBI Director, Robert Mueller, neglected President Trump’s primary campaigner, Rudy Giuliani, and the New York mayor’s conflicting business interests, during the FBI’s investigation of the Anthrax Mailings. Giuliani owned BioOne, the anthrax “clean-up” firm contracted to decontaminate the Capitol Building and American Media Inc. (“AMI”) in Boca Raton Florida. All of this was recklessly neglected, as was the immediate purchase of AMI by Giuliani’s group tied to Deep State interests, including Stephen Schwartzman’s cohort at Blackstone, Roger Altman and Pete Peterson. Mueller’s FBI effectively concealed evidence, implicating Mueller in worse than evidence tampering, criminal concealment, and obstructing justice. By stonewalling investigations into the anthrax attacks that killed and sickened thousands of citizens, AND the Giuliani clean-up operations, and the side effects of CIPRO prescribed for risk management, Mueller, and Fauci too at that time, are susceptible to indictments for criminally negligent manslaughter.

Compounding evidence of insider trading intertwined with mass murders, follow the money and business relationships. The Blackstone Group, again that is the main real estate investment firm that was heavily invested in the Chinese Evergrande Company doing business at Harvard at the time of Fauci and Farrar’s panic over the Indian Paper’s HIV/AIDS revelations, operated in an alliance with GE Capital and NBC Universal/Comcast. That put Deep State cabal in bed with James Murren and MGM Grand Resorts International. Not only was this organization implicated in the [Las Vegas](#)

Deep State Massacre, but MGM & NBC/Comcast released Donald Trump's off-air recordings from "The Apprentice" to help elect Hilary Clinton as president. Moreover, James Murren, CEO of MGM Resorts, sold approximately 80% of his company stock in preparation for the 96 Harvest festival Massacre. Then he repurchased the stock after the crash. The impression of "insider trading" and complicity in, once again, mass murder is clear and convincing.

Equally unnerving, Murren was appointed by President Obama in December 2013 to officiate the National Infrastructure Advisory Council (NIAC). He remained active into 2020 when he attended the May 21, 2020, their quarterly business meeting, at that time focused on **"COVID-19 Pandemic Recovery"** with Brian Cavanaugh (Special Assistant to the President and Senior Director for Resilience, in the National Security Council) and Chris Krebs (Director, Cybersecurity and Infrastructure Security Agency (CISA)). Does that date ring a bell? That is precisely when the sham COVID zoonosis report was published in Nature New Medicine by the Fauci/Farrar co-conspirators in the lab virus cover-up. Curiously, Murren then, as Chairman of the Nevada COVID-19 Task Force, ended his NIAC membership, and in August 2022, President Biden announced a new slate of appointments that effectively refreshed the council's membership.

At the time of Las Vegas Deep State Massacre, Murren was the President's chief adviser on US infrastructure security. Censored records and solid evidence in that massacre investigation shows Murren's administration at the Mandalay Bay knew or had to have known of the multiple shooters fired at the scene of the crime. It was another cover-up and terroristic attack, then targeting mainly Trump supporters and gun advocates attending the 91 Harvest Festival adjacent Murren's hotels.

Getting back to Fauci's Diary, and revelations therein, according to New York Times reporters William Broad and Judith Miller, there were "seven scientists at the anthrax vaccine stockpiling meeting aside from Rudy Guillian and Jerry Heuer. These included "two men who stood to gain financially from the decision. . . ." These men included Dr. Monath and Dr. J. Craig Venter, president of The Institute for Genomic Research near Washington working on anthrax genetics. "The apparent consensus on acquiring vaccines masked deep divisions among scientists and military officials," according to the Times reporters.(10,37) And from Fauci's Diary we learned that the National Security Council official, Richard Falkenrath "was tasked with putting together a briefing document that was an expression of our interest in the problem [genetically engineering risky viruses], but was an alternative approach to the Biological Weapons Convention." Falkenrath was then director for proliferation strategy on the National Security Council staff, where he was responsible for biological weapons proliferation

and preparedness. Fauci wrote, “We crafted something that was a ‘high road’ approach indicating that since we cannot enforce restrictions among committed users and abusers, then at least we can support biomedical research to provide better diagnostics, therapeutics and vaccines. At worst, even if it does not help with bioterrorism, it would be useful for mankind.” It is that “high road” mentality and policy that delivered COVID and several earlier plagues to the world.

B. The METABIOTA ENTERPRISE: Key to the Cover-up and Fauci’s Silence

A major company central to the COVID pandemic and cover-up is Metabiota. Originally named Global Viral Forecasting, Metabiota was founded in 2008 by virologist Nathan Wolfe. Early non-institutional support came from Deep State players—Google and the Skoll Foundation. Google’s partnership with the CIA is well known. Metabiota was first financed in 2013, before President Biden’s preemptive pardons, by Rosemont Seneca Technology Partners (RSTP), a private equity institutional investment firm founded in 2009 by Hunter Biden, Christopher Heinz (stepson of John Kerry), and Devon Archer. It was named after the Heinz family’s Rosemont Farm estate near Pittsburgh and operated as an investment and advisory firm. The 2009 date of this related enterprise’s formation long predates the 2014 pardon and raises prosecutorial justification for advancing a RICO claim against the suspects based on this new and emerging evidence. Later, investors in Metabiota included the CIA’s In-Q-Tel (IQT), Google Ventures, and several other Big Tech companies that ultimately invested roughly \$35 million in disclosed equity and grants.

Metabiota was established to gather infectious disease data, make outbreak predictions, and analyze pandemic risks to in favor of investors privy to this intelligence. Hunter Biden’s investment in Metabiota, tracked through Rosemont that obtained nearly \$130 million in a federal loan program between 2009 and 2010. These loans were repaid, according to media reports. But the precise personal capital contributions by Biden and the others are not publicly detailed and remain crucial to developing prosecutorial evidence through subpoenas and depositions.

Hunter Biden was listed as a managing director of Rosemont’s Washington office during this period. The firm later rebranded as Pilot Growth Equity (“PGE”). PGE’s portfolio of companies included Metabiota, Zenedge (acquired by Oracle seed funded by the CIA) as a major AI cyber-security company; Counsyl (acquired by Myriad Genetics)—a leading biomedicine genetic testing entity; and other firms developing software, AI, health tech, and related technologies.

In 2013, Metabiota was awarded approximately \$8.2 million through 14 contracts (13 of which were with U.S. government agencies). Primary customers included U.S. government agencies including the Department of Defense, State Department, USAID, Armed Forces Health Surveillance Center, Defense Threat Reduction Agency, and others.

Metabiota's earliest financier, the Skoll Foundation, was founded by eBay's first president, Jeffrey Skoll, a Canadian engineer, internet entrepreneur, and billionaire film producer. Skoll's involvement here is ironic, since he is credited for working since 2009 to "help prevent pandemics and other global threats." In 2009, Skoll donated \$100 million to create the Skoll Global Threats Fund to confront threats including pandemics, and spun off another supposedly non-profit entity called Ending Pandemics that focused on Metabiota's main activities, pandemic detection and defense response. Adding bioterrorism to the vaccine industry's so-called "preparedness" efforts, in 2011, Skoll's film company, "Participant," co-produced the film Contagion to raise awareness and panic about the dangers posed by pandemics. The film generated political pressure for more and more appropriations and investor financing.

In December, 2013, again predating Biden's preemptive pardon, the partners in Rosemont led Metabiota's first institutional 'seed financing' of more than \$2 million. Rosemont invested \$500,000 in Metabiota, and by 2015 the total stake grew to \$30 million from capital investors, including the U.S. Treasury Department intertwined Goldman Sachs.

Metabiota's infectious disease focus allegedly centered on proactive detection of emerging pathogens (especially natural virus species jumps from wild animals to humans, called zoonoses). The Fauci cover-up of COVID's lab origin used this falsely alleged zoonosis science and the lay media for damage control. Metabiota conducted the global surveillance and data gathering platforms, risk quantification and modeling, capacity-building in hotspot regions, and commercial/government tools for epidemic preparedness and supposed financial risk mitigation, all the while feeding insiders with trading and investment intelligence to make fortunes from so-called outbreaks.

The company merged field science with laboratory capacity-building propaganda, feeding big biotech data, such as viral genetic sequences as funneled to Dr. Ralph Barack's lab at the Univ. of North Carolina. There, analysts now agree, COVID-19 was sourced from genetically engineering the original bat SARS coronavirus that was mutated into COVID-19. Metabiota's computational modeling and analytics were crucial to the government's financing of COVID's development, but also, predictively, the Trump Administration's response to COVID in late 2019.

During that time, Metabiota was a core partner in the government's PREDICT program (administered with USAID, 2009–2020). This group focused on wildlife virus discovery, spillover risk assessment, capacity-building, and surveillance systems in hotspot countries (particularly in Africa and Asia where bats were collected, and analyzed for viral infections and genetic sequences. Bat coronaviruses were isolated and genetically analyzed. This involved collecting and managing animal supplies, bat colonies, and in some cases human interfaces. Samples and metadata for novel pathogen detection and production were acquired and distributed to labs worldwide.

The sites labs most frequently associated with Metabiota's international work included the Kenema Government Hospital and Viral Hemorrhagic Fever Labs in Kenema, Sierra Leone. They jointly supported or shared facilities that became a key diagnostic lab during the 2014 Ebola outbreak. Curiously, the first Ebola (index case) of the 2014–2016 West African Ebola Zaire outbreak occurred on December 26, 2013 in Guinea. That coincided with Metabiota's initial financing, and also predates the Bidens preemptive pardons. The first victim, a young boy, died two days after the Rosemont partners led Metabiota's first institutional 'seed financing' of more than \$2 million. Coincidence? Not likely, because there are too many coincidences and synchronicities raising red flags.

Metabiota helped establish and operate that lab with Robert Garry's group from Tulane University. Garry was a key player there and in Fauci's cover-up. Garry co-authored the specious Nature New Medicine zoonosis article that claimed COVID came from nature.

Metabiota's presence, surveillance, detection, training, and sample analysis for "zoonotic threats" extended globally, particularly in Africa, disparagingly considered the source of many of the most frightening diseases. In China Metabiota partnered with the Guangdong Institute of Public Health / Centers for Disease Control and Prevention. They listed Metabiota among early global partners for public health and surveillance collaboration. These partnerships appear in PREDICT program documents.

In June 2026, as Director of National Intelligence, Tulsi Gabbard released declassified records describing the U.S. government's funding and support for more than 120 biological laboratories across more than 30 countries. Most of these relied heavily on Metabiota, especially in the Ukraine that hosted more than 40 labs receiving U.S. funding or personnel support (under the "DTRA" the Defense Threat Reduction Agency's Biological Threat Reduction Program. These facilities stored and mutated pathogens. A company called Black & Veatch is repeatedly identified in these records as a major contractor for constructing, equipping, and upgrading multiple Ukrainian

labs. Metabiota partnered with and served as a subcontractor to Black & Veatch on multiple U.S. Defense Department biological threat reduction contracts.

In 2008, around the time Metabiota was being financed in this industry, the DTRA awarded Black & Veatch (“B&V”) the first of its Biological Threat Reduction Integrating Contracts. This was during the George W. Bush administration and Barak Obama’s first term with Joe Biden as Vice President. The five-year contract included five selected subcontractors, including Metabiota, with a \$4 billion cap. This was seen as "a vital part" of the Cooperative Threat Reduction and Biological Threat Reduction program at the Defense Department. Then, in 2010, Black & Veatch commissioned Ukraine's first Bio-Safety Level 3 laboratory. Metabiota provided Ukrainian personnel training in molecular diagnostics, biosafety, operations and maintenance, and laboratory management techniques to run their entire biosurveillance system.

Russian officials, state media, and affiliated actors repeatedly expressed concerns and made allegations about these U.S.-supported biological laboratories in Ukraine (and more prominently in Georgia and other former Soviet states) beginning around that time, from 2009 onward, escalating sharply in early 2022 before Russia invaded the Ukraine. Putin’s government strongly objected to the U.S. Biological Threat Reduction Program. Russia portrayed the enterprise as a military-biological weapons program near its borders that violated or risked violating the Biological Weapons Convention, that Fauci’s Diary note corroborates.

In early 2020, again most synchronous with COVID-19’s emergence, Metabiota operated its own Epidemic Tracker and risk-modeling platforms. It performed independent early detection and spread forecasting, mapping likely international spread. It supplied proprietary risk analytics, scenario models, and early-warning insights to private clients, companies, insurers, and some government users. It compiled its own composite incidence datasets from multiple.

In summary, Metabiota was largely a U.S. Military financed entity of central importance to the emergence, reconnaissance, and defense against Ebola, COVID and other threatening outbreaks. On behalf of the federal government, and the Biden’s co0investors, Metabiota’s global enterprise was pivotal to the military and intelligence communities, as well as private investors networking in the Deep State to engage bioterrorism commerce, racketeering in organized crime. Federal awards to Metabiota for the DoD/DTRA, USAID and PREDICT enterprise, the State Department, and other sources, have cited total federal funding between \$50 to \$70 million across all federal sources.

With the number of private co-investors growing over the years, an internal 2014 Rosemont partners memo, recorded the year of the pre-emptive pardon of Hunter Biden, Fauci, Biden Family Members, and General Milley, projected that a \$10 million investment in their company at that time would return a percentage of Rosemont's ownership to approximately 13.42%.

The following year, in 2015, Rosemont partnered with Martis Capital, Inc. that made a "growth equity/private equity investment as Metabiota scored \$30 million in a stock offering largely consumed by Martis. By 2017, Metabiota's capital was valued at \$156 million, and in 2022, as Metabiota's ties to Hunter Biden, Devin Archer and the COVID pandemic were made public, Martis sold its majority share in Metabiota to the Heada Company in a transaction shrouded in mystery. No one can currently say how much money, if any, Hunter Biden received from the sale. A separate August 2022 transaction, Metabiota sold certain epidemiological data infrastructure assets to Ginkgo Bioworks for ~\$10.4 million (mostly in stock). But no public purchase price has ever been disclosed for the full acquisition of Metabiota. This information awaits further discovery.

House Oversight bank-records, memos and independent analyses of them indicate that Biden family members (beyond Hunter, including to James Biden, Joe's brother, and Hallie Biden, Beau's widow) received a minority share of the overall foreign payments made to the Biden enterprise from the Ukraine, Romania, China, Kazakhstan and elsewhere. Of roughly \$4.9–5 million going to family members across those sources in the relevant period, the large majority went to Hunter or his companies.

IV. OUTBREAK INTELLIGENCE, GLOBAL COMMERCE, and CHINA'S TIMELY NEW VACCINE LAW

Substantial evidence exists proving that Chinese government officials had foreknowledge of the allegedly *planned* COVID virus outbreak months before the reported outbreak in the Fall of 2019. Chinese officials, who were distrusted by Fauci and others in his inner circle, were in fact conducting business at Harvard throughout the period of COVID's development by Daszig's group at EcoHealth Alliance and the Wuhan Institute. This is where the Deep State's global bioweapons enterprise, including Chinese operations and influence, is additionally evidenced.

The corrupt Chinese administration was made apparent during the week that Fauci's cohorts in coverups panicked over the Indian Paper. That same weekend of January 31st, 2020, Chinese military and business officials expressed grave concerns about their investments challenged by the Indian Paper and the HIV/AIDs threat becoming public

knowledge. These officials met with Harvard's Medical School President, George Daley. This evidence was provided in Fauci's e-mails, and corroborated by Ashley Rindsberg in her May 2022, "Harvard Connection" article published in *The SPECTATOR WORLD*. Rindsberg asked the question, "Was a Fauci-endorsed Chinese donation part of the lab-leak cover up?" The answer was, most certainly.

A. Chinese Interests in the COVID Enterprise

On Sunday, February 2, 2020, Daley wrote Fauci, "Alan Garber, Harvard's provost, and I met yesterday with a team led by Jack Xia, the CEO of China's Evergrande Company, and Dr. Jack Liu, Evergrande's chief health officer." "Tony," he asked for "whatever information you are willing to share on your current efforts to coordinate a response [to the Indian Paper]."

Rindsberg clarified: "It was an odd question on its own: What business did Evergrande — then the most valuable real estate company on earth, but also widely known to be catastrophically indebted — have with the director of America's pandemic response? But Daley's next line was stranger still. '[Xia and Liu] stated they were acting on behalf of Dr Zhong Nanshan, China's key point person on the coronavirus outbreak.'" Evergrande's e-mail from Liu to Daley was virtually entirely redacted.

Who redacted it? Censors in the Freedom of Information Offices of the HHS and NIH, which oversees Fauci's NIAID. Meaning the redactions were performed by political and institutional insiders for reasons that are highly suspicious, indicating fraudulent concealment and evidence tampering. What is known from these facts, and also the Chinese/American business dealings at Harvard related to COVID, is that: number 1) the supposed rift between East and West, China and its allies, and America with its friends, is substantially contrived. The illusion of geopolitical and economic separation fades with knowledge of both competition and the common interests of China's Evergrande Company and America's Blackstone Company—the world's two leading real estate enterprises.

In 2012, Blackstone, owned by Stephen Schwartzman, entered into a joint real-estate venture with Evergrande involving a large residential development in Guangzhou China. Blackstone assumed management of that Asia Real Estate Fund in 2010, then exited with a huge profit in 2012 when Evergrande bought back the stock. Accordingly, the illusion of geopolitical and economic separation in the global private equity investment market only operates in accordance with propaganda, the illusion of competition, the divide and conquer strategy, as real life commerce moves on the global

chessboard owned and operated covertly by Deep State oligarchs, such as those Epstein, Fauci and Farrar served, including Bill Gates.

This conclusion is additionally proven by the massive U.S. funding that went to the Wuhan lab and elsewhere in China; continued commerce and scientific collaborations between the U.S. and China, including those of Charles Lieber at Harvard suspiciously convicted of Chinese espionage for illegally transferring energy devices and intelligence to China where he now works. In fact, consistent with all of these cover-ups, the FBI misrepresented the cause of Lieber's prosecution. They claimed he was illegally transferring "vehicle battery technology," omitting the human vehicles targeted to receive bioelectronic vaccine graphene devices. Lieber pioneered these vaccine additives in collaboration with MIT's and Moderna's Robert Langer. The two experts in nano-neuro biotechnology and bioelectronic vaccine devices have continued to escape scrutiny by official investigators and the media to the time of this filming. Recently, it was disclosed that England's military purchased bugged naval vessels from the Chinese enabling eavesdropping on Royal Navy operations in the Hormuz Strait. Such compounding evidence proves the global enterprise's existence in war and biotechnology commerce.

B. Chinese Investments in Moderna and Big Biotech

In addition, in February 2018, just as Metabiota was supplying the Wuhan lab's operations through the EcoHealth Alliance group, the mRNA vaccine maker Moderna raised a \$500 million Series G financing round at a valuation of roughly \$7 billion. Sequoia Capital China was listed among the *new* investors in that round, alongside others such as a subsidiary of the Abu Dhabi Investment Authority (ADIA). This became one of China's most successful venture capital firms, backing major companies such as Alibaba and TikTok's parent, ByteDance. Their primary investments were in consumer internet, technology, and like the Evergrande company, healthcare.

Sequoia Capital made a venture equity investment in Moderna as a late-stage private biotech company in 2018, the precise time NIAID grants were given to develop and test the gain-of-function antigenic bioweapon. This sourced the SARS-COVID virus variants released from the Wuhan Institute of Virology (WIV1). They used humanized mice, according to Fauci's Diary note of May 21, 2020, synchronously written at the time of the Nature New Medicine zoonosis publication.

Sequoia Chinese investment in Moderna had to have been on Fauci's mind when he wrote to Emily Erbelding on or about March 28, 2020 stating, "I hope that you feel like my foot is on your neck right now to get this [Moderna vaccine into Phase 2 trials]. This

was recorded in Fauci's Diary only a few days after the Fauci/Farrar/Anderson/Garry bogus defense against the lab virus theory that appeared in bogus science paper. Apparently, by that time, the FBI, under Christopher Wray, had investigated and censored those findings as evidenced in Fauci's Diary.

Emily Erbelding was part of Fauci's senior administrative leadership at NIAID. She administered the Division of Microbiology and Infectious Diseases, a major division within the NIAID at the NIH. Under Erbelding's direction, the group handled major programs related to emerging pathogens, pandemic preparedness, and related research. Her background in infectious diseases developed at Johns Hopkins School of Medicine. That school played the pivotal role in terrorizing We The People. They reported the COVID casualties, heavily fueling pressures to develop Moderna's mRNA vaccine that Erbelding referenced with Fauci's foot on her neck. She was ordered to do whatever was necessary to advance Moderna's vaccine through Emergency Use Authorization, following the FDA's approval of the Phase 2 trials. Erbelding's mail noted their administration's "critical failure in communication . . . in collaboration with David O'Connor . . . related to the Moderna mRNA vaccine . . . proving to the FDA that vaccine related [gain-of-function] enhancement won't be an added risk to participants [in] . . . these experiments." This too is another 'smoking gun.'

Contemporaneously, Sequoia Capital (through a China-related growth fund) established a direct investment linked to Moderna and the Evergrande group. One of the participants was a Sequoia vehicle — reported as Sequoia Capital Qixi Festival Fund / SCC Growth VI 2020 — which contributed HK\$3.45 billion as part of a larger HK\$23.5 billion strategic investment round.

Dr. Zhong Nanshan, China's key point person on the coronavirus outbreak was China's top epidemiologist and founder of the prestigious Guangzhou Institute of Respiratory Disease. Journalist Rindsberg noted, as I did, what she called the "unthinkable" reality. That this COVID enterprise was a "tight-knit global public health and virology research and vaccine development community." I realized it was racketeering enterprise gaining money and power from pandemics and global frights, or classic bioterrorism.

C. The Harvard Depopulation Portal

Back at Harvard, during the panic weekend, Evergrande, the Chinese real estate firm on whose behalf George Daley had contacted Fauci, pledged a \$115 million donation to Harvard Medical School.

Harvard, mind you, held a close relationship with Jeffrey Epstein and Epstein's estate successor executor, Boris Nikolic, who introduced Bill Gates to Epstein. Harvard was a major hub of Epstein's academic investments. Other Harvard officials and professors who engaged with Epstein, Nikolic and Gates included dean professor Larry Summers; psychiatrist Stephen Kosslyn who taught how to get populations to accept artificial intelligence; linguistics scholar, Noam Chomsky, who explained AI language processors; Epstein's attorney Alan Dershowitz who defended Epstein in 2008, obtaining a specious sentence; and Martin Nowak in his Program for Evolutionary Dynamics involving mathematical biology and frequency impacts of sound and light on stem cells, health, and longevity. All of this intelligence was shared with the Chinese and hidden from Americans.

Entering the realm of population control and species conversion, Nowak explained tissue architecture, regeneration, and genetic mutation technologies to Epstein and Gates. His research modeled how tissue-specific stem cells differentiated. His equations proved that certain tissue architectures act as "evolutionary traps" to minimize the risk of stem cells accumulating cancer-driving mutations. Nowak's work intertwined with Epstein's and Gates's interests and financial support for Geoffrey West at the Sante Fe Institute. That was located about 30 minutes drive to Epstein's Zorro Ranch, that was under investigation for suspected murders of two women. West received more than a million dollars from the Gates Foundation to study scaling laws, like musical scaling that was of great interest to Epstein. Gates's father supported Planned Parenthood, and Epstein and Gates desired to reduce world populations and genetically improve the human race, according to Epstein's e-mails. Noam Chomsky wrote Epstein about the possibility of protecting the wealthy oligarchy by depopulating the planet's poor people. Epstein even proposed donating his own sperm to advance West's work on biological and urban evolution for human reproduction following mathematical and musical scaling laws.

Gates's grant to West came in 2012, two years after Gates lectured at a Ted Conference saying: "The world today has 6.8 billion people. That's headed up to about nine billion. Now, if we do a really great job on new vaccines, health care, reproductive health services, we could lower that by, perhaps, 10 or 15 percent." That entire concept is grossly flawed, heavily confounded in its historical association between falling child mortality rates and women's fertility. Even if vaccines are said to have contributed to healthier children, the subsequent fertility decline has multiple interacting causes, not simply child mortality rates. Gates, asserting a clean vaccine-driven pathway to population reduction, over-projects what the less-conflicted evidence shows.

So the Gates Foundation grants to Harvard researchers must be competently investigated, especially the money given for HIV, tuberculosis, maternal/child health, and infectious diseases. Focusing on HIV/AIDS in 2011, the Gates foundation gave \$100,000 to Daniel Kavanagh (of the Ragon Institute of Mass General Hospital, MIT and Harvard) for HIV latency research to determine how the AIDS virus causes cancer over time. That early work was critical to the development of the mRNA vaccines at Pfizer and Moderna.

Further evidencing Bill Gates's complicity in the Anglo-Asian COVID industry and Cover-up conspiracy, in January 2016, Moderna entered a global health project framework agreement with the Bill & Melinda Gates Foundation. The Foundation committed up to \$20 million (with potential for additional follow-up funding that could reach a total of ~\$100 million) to support mRNA-based development projects focused on infectious diseases, starting with AIDS and HIV antibody therapeutics, consistent with COVID-19's composition and impacts.

The donation was used to fund the Harvard-Evergrande-Guangzhou partnership known as the Massachusetts Consortium on Pathogen Readiness (MassCPR). This was publicized in a March 5, 2021, *Boston Globe* op-ed co-authored by Harvard Medical Dean Daley; Arlene Sharpe, co-director of Harvard's Evergrande Center for Immunologic Diseases; Penny Heaton, then-CEO of the Bill & Melinda Gates Medical Research Institute; and others. Also on March 5th, 2021, *Science* magazine published a feature story on Evergrande's donation pledge, which quoted Jeremy Farrar, who orchestrated with Fauci the lab virus cover-up. The article included a quote from Sten Vermund, dean of the Yale School of Public Health, who told *Science* that "coronavirus is not good for real estate," obviously disconcerting to China's Evergrande company and Blackstone, the world's leading real estate developers.

D. Sequoia Capital, Evergrande and EcoHealth Alliance

On February 4, 2020, immediately after Dean Daley e-mailed Fauci about coordinating a response to the "Indian Paper" that evidenced HIV/AIDS genes spliced into the COVID gain-of-function bioweapon, to protect against liabilities as well as Sequoia Capital's direct investments in Moderna and the Evergrande group of as much as HK\$23.5 billion, Evergrande approved a Harvard donation of \$100 million, and Fauci made his first pandemic-related call to the head of the Chinese CDC, George Gao. This was "to exchange information on the epidemic," wrote Fauci. On the same day

concerning the lab virus, officials at Harvard and the Guangzhou Institute of Respiratory Health held their first discussion on “scientific research cooperation.”

Again, all of this solidly evidences the global racketeering enterprise leveraging COVID, HIV/AIDS and other infectious diseases. George Gao was chief of the Chinese CDC. He was reported by England’s Jeremy Farrar as an “old friend,” and principal figure in the Global Virome Project. Completing the circuit of co-conspirators, the Global Virome Project was co-led by Peter Daszak of EcoHealth Alliance. Their claimed aim was to identify, collect and catalog 99 percent of the world’s estimated million-plus viruses that could potentially harm humans. Ironically, the viral disease consortium is billed as the billion-dollar embodiment of virology investors that believe that by identifying all potentially harmful viruses, storing them in questionably secure bioweapons labs, vaccine makers can prevent outbreaks.

E. The Global Intelligence Network: Capitalism and Communism Versus Deep State Fascism

Chinese intelligence officials were certainly aware of the Indian Paper, the panic it caused, vaccination risks, and the potential loss of billions of dollars already invested in mRNA vaccine developments by Sequera, Evergrande, Gates, Pfizer, Moderna, DARPA, Epstein’s co-investors, and others backing this “novel” treatment. More importantly for the future of world health and National Security in every nation, Chinese intelligence had to have anticipated the emergence of COVID from the Wuhan Lab and Peter Daszig’s EcoHealth Alliance because Shi Zheng Lie, the Chinese “Bat Woman” was monitoring the entire operation—from the bat caves in China and Africa, to Metabiota’s provisions to Baric’s lab and then Wuhan. Chinese intelligence knew, or should have known, the falsity of the Bat Woman’s repeated claims that COVID came from bats by zoonosis. They were monitoring what was actually happening in Project DEFUSE and at Moderna in preparation of the bat vaccine going rogue. Chinese intelligence had advance knowledge of the outbreak because they knew Fauci and Farrar, representing the old money of colonialist England with interests backing Pfizer and Moderna’s investments in 2016 and 2017 when two critical things happened. Not only did America outlaw such gain-of-function bioweaponization causing Fauci to transfer the entire project to EcoHealth and Wuhan; but also Fauci openly stated in January 2017, during his Georgetown University Lecture, that the incoming Trump Administration was going to be heavily challenged by a new unexpected plague. Thus, Chinese intelligence had good cause and compelling interest to: a) distrust Western vaccines, especially Pfizer and Moderna’s mRNA injections that they opted out

officially on August 27, 2019, despite having made massive investments therein; and b) develop their own vaccines in commercial competition with the West.

Chinese officials were in constant contact with the researchers advancing the novel mRNA bat spray. They had already knew that something was seriously wrong at Harvard and MIT in the Charles Lieber and Robert Langer Labs. Langer was Moderna's chief scientist and funding agent getting money from DARPA. Lieber was Langer's co-author. They were the world's leading bioelectronic technologies co-developers. Both maintained close ties to U.S. Military and health agencies, including Fauci's NIAID and Francis Collins's NIH. Both had been working on top secret biotechnologies in advancing AI administer electromedicine. mRNA hydrogel delivery was essential to the future of healthcare commerce and population control. Both were advancing openly and in secret, nano-neuro bioelectronic lipid hydrogel vaccine delivery devices fueled using graphene that officials deny. Lieber's sudden arrest just as news broke of the COVID outbreak certainly raised red flags in China where Lieber sought and ultimately gained refuge. Foreseeably, this intelligence and these conflicting interests would determine world leadership in advanced diagnostic and treatment systems featuring AI, human body data mining, mass surveillance, and brain-cloud correspondence. Chinese intelligence had to have known precisely what the U.S. CIA's "Project Stargate" involved. They would have known in advance what the Trump Administration's press announcement on Project Stargate on January 21, 2025 meant for the future of world fascism. A global dictatorship was at hand through medicine in the Age of AI, vaccinology, and quantum computing. This is what Larry Ellison of Oracle cryptically described for the quintessential use of mRNA vaccines in the future of cancer diagnosis and treatments under AI-controlled systems.

Apparently, China anticipated the COVID pandemic as did American intelligence officials. This best explains the initial censoring, and then republishing the "Global Legal Monitor" reporting on Chinese news agencies heralding "China['s New] Vaccine Law Passed" on August 27, 2019. That was about six weeks before the first COVID cases were identified. The new law took effect on December 1, 2019, only weeks after China participated in Event 201. Therein, China's CDC representative, George Gau, urgently and repeatedly asked, "Where is the money" that China needed to respond to the forthcoming pandemic.

It appears that Chinese officials, as well as American officials, didn't want all this intelligence to be made public. So in America, apparently, officials concealed this public record on February 8, 2020, as evidenced by the censored page that I fortuitously [recovered from Wayback.org](#) as shown here. This censored record was re-published following my acquisition, on-or-about February 9, 2020.

That legal record makes known that the Chinese government opposed the commercial interests of Big Pharma. China's new law: (1) criminalized vaccine manufacturing and distribution misbehaviors; (2) monopolized the manufacture and distribution of vaccines in China in favor of the government; (3) pledged free vaccines were to be exclusively administered to citizens; (4) mandated vaccinations for all Chinese citizens; and (5) created a compensation program for vaccine injuries. (Compensation, presumably, would be minimized by the government taking over vaccine manufacturing, distribution, testing and certification processes, thereby assuring quality, efficacy and safety of vaccines—actions Big Pharma opposes, albeit allegedly neglects.)

Accordingly, much like the opposition President Trump experienced from Democratic Party leaders financed by Big Pharma/Big Biotech/Big Banking (Deep State) special interests, the Chinese outbreak of the 2019 nCoV/HIV/SARS bioweapon may be viewed as industrial espionage or sabotage against both governments and both presidents, Trump and Jinpin. Aside from profitable depopulation and global fascism, the COVID pandemic appears to be retaliation against the anti-Big Pharma anti-globalist policies of both countries; both of whom oppose relinquishing ultimate political authority to a globalist syndicate.

V. CONCLUSION

A. THE HYPOTHETICAL REQUIRES ADDITIONAL EVIDENCE

From this point forward in the COVID CONSPIRACY AND COVER-UP, the hypothetical requires additional evidence. Following the money generally leads to indictments. We know much of this matter sources from HIV/AIDS science and the public and private parties that commercialized AIDS beginning in the early 1980s. We see from Fauci's Diary anthrax and smallpox vaccines were similarly sold terroristically, as was the H1N1 swine flu, Ebola, and H5N1 Bird Flu. Each "outbreak" threatened civilization for profit. Each threat, according to much evidence available here and elsewhere, sourced from labs. The public record now shows the COVID pandemic is similarly situated, it fits the pattern-and-practices of leading players solidly connected financially to organizations and entities intertwined with the Biden family, Dr. Fauci, the military's General Milley, and the intelligence community.

For example, Metabiota and Rosemont Seneca's activities received both USAID-PREDICT and the Defense Threat Reduction Agency's ("DTRA's") Biological Threat Reduction Program financing. Metabiota partnered with and served as a subcontractor

to Black & Veatch on multiple U.S. Defense Department contracts predating 2014—the preemptive pardons date. Without specifically identifying the CIA or FBI in its publications, Black & Veatch advertises its service to the “Intelligence Community” in the United States.

In 2008, the U.S. DTRA awarded Black & Veatch the first of its Biological Threat Reduction Integrating Contracts, while Rosemont Seneca held an equity interest. EcoHealth Alliance operated in the same PREDICT consortium while collaborating with Wuhan researchers, sharing data with Baric’s lab also before 2014.

Now consider a counterfactual. Suppose more subpoenas produced bank records, more internal emails, or capitalization tables showing that Hunter Biden or other family members derived measurable financial benefit from Metabiota’s government contracts, that family co-investors shared in those benefits, and that official influence or undisclosed conflicts of interest helped secure or protect the awards—while the same network supported EcoHealth’s collaborations with the Wuhan lab and sequence sharing with Ralph Baric’s lab.

Under those conditions, competent investigators would examine several federal statutes, including:

- Bioterrorism (18 U.S.C. § 175) (Sec. 202) Requires all persons (unless exempt) in possession of biological agents or toxins listed under the Public Health Service Act to notify the Secretary of Health and Human Services of such possession.
- Violation of H.R. 3448, Daszak/Wuhan agents lacked official FSAP certificates of registration for possessing or transferring “(1) a select agent to a person who the transferor knows or has reasonable cause to believe is not registered as required shall be fined, or imprisoned for not more than five years, or both; and (2) knowingly possesses a biological agent or toxin where such agent or toxin is a select agent for which such person has not obtained a required registration shall be fined, or imprisoned for not more than five years, or both.”
- Racketeering in Organized BioCrime (RICO; 18 U.S.C. § 1961(1)(175-178;229-229F; 1343)
- Honest-services fraud and wire fraud (18 U.S.C. §§ 1346, 1343)
- Conspiracy to defraud the United States (18 U.S.C. § 371)
- Conflict-of-interest provisions (18 U.S.C. § 208)
- Possible money-laundering charges if proceeds were concealed through layered entities.

To move from public records to a prosecutable case, investigators would need to seek:

1. Complete ownership and distribution records from Metabiota and Rosemont Seneca showing actual money flowing to named individuals.
2. Communications demonstrating that official acts—contract awards, introductions, or protective decisions—were linked to private financial interests.
3. Conflict-of-interest certifications that omitted material facts.
4. Banking records tracing the path of funds.

Priority subpoenas would target Metabiota and its officers, Rosemont Seneca and related entities, including Black & Veatch subcontract files, EcoHealth PREDICT budgets and allocations, the military's DTRA and USAID award packages, the CIA's In-Q-Tel investments, Google, Bill Gates's enterprise with Epstein and Nikolic, and the relevant financial institutions, especially Harvard, MIT, Stanford, the Sante Fe Institute, Arizona State University, Tulane and Scripps. Pre 2014 criminal activities would nullify the Biden and Fauci Pardons. In any case, at this point, given new and emerging evidence, state charges and civil remedies remain available in principle.

The main lesson learned from this outrageous COVID disaster and murderous enterprise is that a moratorium must be legislatively imposed immediately on virology and vaccinology's genetically tinkering, gain-of-function research and related developments. This urgently needed moratorium is the only way *We The People* in the United States, and people everywhere, can rest assured another pandemic, potentially even more devastating, won't happen. A global moratorium with harsh consequences for violators is urgently needed to secure society, at least until ethical stewardship and competent independent regulatory oversight of bioweapons and cancer virus labs experiments are assured. The Biological Weapons Convention must be imposed on all nations, as much as Iran must be prohibited from having nuclear weapons.

In closing, I recall Dr. Joshua Lederberg's warning. He relayed the scientific consensus opposing germ warfare in a 1971 *Science* article. He wrote: "Germ warfare" that today includes genetically altering microbes for allegedly public health, "has been universally condemned as a vile perversion of scientific insight. This emotional reaction is buttressed by a rational consideration of the strategic and political instabilities that would follow from threatened uses of biological weapons and of the possibilities of worldwide spread of infectious disease. [All in addition to the unjust enrichment gained by bioweapons investors and the terroristic media.] In the interest of world order, and to reduce the possibilities of igniting world conflict, the development, stockpiling, and general accommodation of biological weaponry must be controlled by international agreement."

This is why it is so outrageous, despicable, dangerous, and ironic that Dr. Lederberg participated in the NIH and National Security Council meeting with key analysts reviewing the classified White Paper that has never been declassified or openly revealed or even contested before this moment, before Fauci's Diary note of August 2, 2001, was revealed. That was when President Bush, five weeks before 9/11, rejected renewing America's allegiance to the world Biological Weapons Convention, allegedly on the basis that it was "unenforceable." Fauci wrote, "We crafted something that was a 'high road' approach indicating that since we cannot enforce restrictions among committed users and abusers, then at least we can support biomedical research to provide better diagnostics, therapeutics and vaccines. At worst, even if it does not help with bioterrorism, it would be useful for mankind." That "high road" mentality, justification, and current policy, brought us COVID. As many as 36 million people have died as a result. It should never happen again.

-End-
